Show statistical uncertainty (Overall)

From 2022-23 onwards there is a slight population change for the **attainment (degree outcomes)** indicator, which may impact indicators and gaps for a few providers. For further information see the Help guide at the top of this dashboard.

There are additional risks to data quality in some areas of the 2022-23 returns, but in general we consider the data is fit for purpose and facilitates robust measures of student outcomes and experiences. For more detail, see: <https://www.officeforstudents.org.uk/data-and-analysis/student-outcome-and-experience-measures/data-quality/>

Completion indicator values for: Sex

Indicator value: Percentage of students that complete their studies in higher education
